## EDUCATION

### GEC, AURANGABAD.

B.TECH IN COMPUTER SCIENCE

CGPA : 8.78

### PRATAP COLLEGE

HSC SCIENCE

May 2018 | Amalner

CGPA: 84/100

CET Score : 99.10

## SKILLS

### PROGRAMMING

Frontend :

• React • Angular • Javascript

HTML • CSS • Tailwind

Backend:

• NodeJs • ExpressJs Databases:

• MongoDB • MySQL

Languages :

• C • CPP

• TS

Developer Tools:

• GitHub • GitLab • VSCode •

CodeBlocks

### SOFT SKILLS

• Team Player • Leadership •

Communication skills

## CERTIFICATIONS

• Front End - Full Stack Web Development  
Certificate of Excellence

• Back End - Full Stack Web Development  
in Node.js

• Introduction to C++ - Certificate Of  
Excellence

• Data Structure and Algorithms -  
Certificate Of Completion

## ACHIEVEMENTS

• Second rank in ODE-TO-CODE  
competition organised by Wings-2023  
GECA.

• 99.10 perc. in MHT-CET 2019

• Solved 300 + problems on **Leetcode**

## EXPERIENCE

### IAURO SYSTEM PVT. LTD | ASSOCIATE SOFTWARE ENGINEER

July 2023 - Present | Pune

## PROJECTS

#### RMU Learning Hub :

• As a Frontend Developer, I'm leading the development of a dynamic e-learning platform used by **5,000+ users**. I've implemented the Swimlane Management module, allowing admins to create and manage **custom dashboards**, **improving user experience** and engagement to **30 percent**.

• Additionally, I redesigned course cards and developed UI components as per Figma designs, enhancing overall **re-usability**.

• My role includes building **key admin features** like course creation and reporting analytics, with **access-based content visibility**.

• Collaborating with a colleague, I've taken full **ownership** of feature development, **ensuring quality and scalability** in a high-impact environment.

#### Authcom :

• I played a pivotal role in developing Authcom, a solution that enables banks and insurance companies to generate legally admissible **evidence certificates** for SMS and email communications. This feature has **improved customer trust** and compliance by providing verifiable proof of message delivery.

• By implementing **micro-frontends** with NX, I enhanced the platform's scalability, reducing load times by **20 percent**. I also integrated the echart-for-react library for real-time analytics, enabling a **30 percent** faster reporting process.

• Additionally, my work on drag-and-drop features and form data handling **streamlined user interactions**, led to a **25 percent** increase in **operational efficiency**.

• Direct **communication with clients** ensured that the solution met their specific requirements and significantly improved my **Communication skills**.

#### Telephonica :

• Contributed to Telefonica, a telco project that manages network calls, routers, and tower networks, presenting this data in a highly visual format.

• I developed dynamic components like a multi-select dropdown with search functionality and integrated Apache **ECharts** for visualizing large datasets, improving **data interpretation by 30 percent**.

• We also built a **config-driven UI** tool using **Gridster**, enabling customizable dashboards. My work involved understanding and navigating a vast codebase and enhancing **debugging skills**.

### IAURO SYSTEM PVT. LTD | SOFTWARE INTERN

January 2023 - June 2023 | Pune

## PROJECTS

#### Survey form :

• As part of an enterprise-level project similar to **Google Forms**, I developed key backend functionalities, including **schema design** for forms, users, and responses.

• I created **robust APIs** to manage form operations (**CRUD**), handle user authentication, and process form responses. My work involved critical decisions on database design, choosing between **SQL and NoSQL** to optimize performance.

• Additionally, I implemented features to map forms against user IDs for **historical tracking** and developed functionality to **export form** responses as sheets.
